**DETAILED ACTION**

Claims 1-38 are pending in the present application.

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-19 and 33-38, drawn to nucleic acid sequences, host cell transformed with said DNA.

Group II, claims 21-22, drawn to an antibody.

Group III, claims 23-31, drawn to a protein encoded by the nucleic acid sequences of the claimed nucleic acid sequences.

Group IV, claim 32, drawn to a pharmaceutical composition.

The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Pursuant to 37 C.F.R. §1.475(d), the ISA/US considers that where multiple products and processes are claimed, the main invention shall consist of the first invention of the category first mentioned in the claims and the first recited invention of the other categories related thereto. Accordingly, the main invention, Group I, comprises the product, a polynucleotide encoding a polypeptide of interest, a vector and a host cell. Further, pursuant to 37 C.F.R. §1.475(d), the ISA/US does not consider

Art Unit: 1636

any feature which the subsequently recited products and methods share with the main invention as a special technical feature within the meaning of PCT Rule 13.2 and that each of such products and methods accordingly defines a separate invention.

The subject matter of Groups II, III and IV recite antibodies, proteins and pharmaceuticals respectively. These products of these groups are not specially adapted for the manufacture of the polynucleotide and host cells of Group I such that unity of invention exists. Moreover, the products of Groups II, III and IV have considerations that are not relevant to the invention of Group I. First, each of these products are distinct structural and functionally for the polynucleotide and host cell of Group I. For example, the pharmaceutical composition of Group IV requires considerations of efficacy, dosage, toxicity and physiological conditions that are not necessarily required for the antibodies and the claimed proteins. Also the antibodies and proteins differ from each other functionally and functionally rendering the use of one independent from the use of the other.

The nucleotide sequences, SEQ ID Nos: 1-31 and 52, of the instant claims are subject to a restriction requirement. Nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. Moreover, one sequence is not necessary of specially adapted for the use or production of the other such that lack of unity is proper. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq. Accordingly, in most cases, only one (1) independent and distinct sequence will be examined in a single

Art Unit: 1636

application without restriction. A complete response to this restriction requirement requires Applicant to choose a single sequence subject to the restriction of the instant claims and sequences.

*Conclusion*

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
